

WHITEPAPER VIDDGET BANK

Why Viddget exists?

Recent studies from Accenture and American Express reveal that we are in the midst of a digital transformation that we've never seen before.

In today's competitive market - service is sales!

This is why Viddget exists. We add additional human touch and help our customers to increase their sales and customer satisfaction. Because people are people with emotions. Technology can help, but it should not replace people.

expect chatbots to always offer an option to transfer to a live person

prefer dealing with humans via digital channels for solving customer services issues

prefer live chat purely because of the immediacy it offers compared to other channels

have bailed on a transaction or did not convert because of a poor service experience

About Viddget Bank

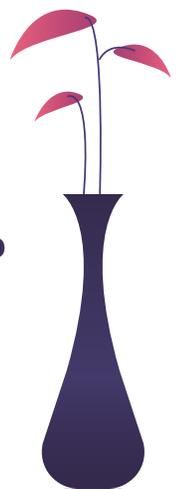

If your company is working within sales, support or customer service, you know how competitive the market is. Viddget allows your company representatives to communicate with your most valuable customers in an easy-to-use video chat. No installations needed on customer side. Viddget is a unique interactive solution where we seek to give your representatives the right tools to offer your end customers the very best service and a great customer experience, in a more personalized manner. The solution is secure, and it is compatible with today's most common and used online verification systems such as BankID in the Nordics.

With our long expertise working with Banks and Financial Services we have collected a great deal of requirements on functionality which we have created bank specific packages to make it easy for our customers as it is for your customers.

Viddget Bank include a set of modules: Viddget Basic, Security package, Network package, E-banking package, Commercial package and Know Your Customer (KYC) package.

**We do what robots don't.
We put heartbeat back to
customer service!**

What's included in Viddget Bank BASIC
